**Re: Second Quarterly Report of Centennial Communications Corp.
On Phase II E911 Compliance**

Dear Messrs. Solomon and Sugrue:

Pursuant to the FCC's Order to Stay issued in CC Docket No. 94-102,¹ Centennial Communications Corp. ("Centennial") hereby files its second Quarterly Report detailing our progress in deploying Phase I and Phase II enhanced 911 ("E911") service in our markets. Because Centennial provides CMRS service in two distinct markets, this report is divided into two sections -- the first explaining the status of Phase II E911 deployment in Puerto Rico, and the second part reports on Phase II E911 deployment in our domestic markets.

I. Puerto Rico

Centennial Puerto Rico License Corp., a subsidiary of Centennial, holds the B block broadband PCS license for MTA 25 – Puerto Rico/US Virgin Islands. Centennial has chosen a network-based solution to deploy Phase II E911 in this MTA.² A single PSAP serves Centennial's entire service area in Puerto Rico. As we have previously advised the Commission, Centennial has not yet received a request for Phase I or II E911 service from this sole PSAP. However, we note that we have been in regular contact with the PSAP, and we are aware that the PSAP has begun the planning and implementation process for both Phase I and Phase II E911 service. Previously, we reported to the FCC that the PSAP in Puerto Rico expected to submit

FCC 02-210, released July 26, 2002

On September 26, 2001, Centennial Puerto Rico License Corp. electronically filed an "Amended Report on E911 Deployment Requirements" in which we advised the Commission that Centennial had decided to switch our E911 Phase II solution for the Puerto Rico market from a handset-based solution to a network-based solution.

their request for Phase I/II E911 service to us in early 2003. However, the PSAP is in the process of completely renovating its entire E911 system, and because a renovation Request for Proposal ("RFP") process held by the PSAP in 2002 was unsuccessful, we have been advised that the delay in this RFP process likely will result in a PSAP delay in requesting E911 service from Centennial. Centennial attended the first PSAP RFP planning meeting on August 19, 2002, and we intend to attend any future planning meetings to monitor the PSAP's progress. By attending these planning meetings, we hope to be able to coordinate our E911 Phase II implementation process with the PSAP's process.

In addition, Centennial now provides service to the U.S. Virgin Islands of St. Croix and St. Thomas. Each island is served by a single PSAP; however neither PSAP has made a request to Centennial for either Phase I or Phase II E911 service.

II. Domestic Markets

Through five different subsidiaries,³ Centennial holds licenses to provide digital cellular service in 30 markets in the Midwest and Southern United States. Centennial provides cellular service in the following six states: Indiana, Louisiana, Michigan, Mississippi, Ohio and Texas. Centennial has chosen a network-based solution offered by Grayson Wireless to deploy Phase II E911 in its domestic markets.⁴

Phase I Service - Attachment A to this letter is a list of all PSAPs to which Centennial presently is providing Phase I E911 service, and the date that Phase I E911 service was timely implemented. As the chart shows, Centennial continues to receive PSAP requests for Phase I E911 service and we continue to implement Phase I service as valid requests are received. As we noted previously, Phase I E911 service has been fully deployed in our Texas markets. Centennial also notes that, to date, we have not received any valid requests for Phase I (or Phase II) E911 service from PSAPs in the state of Ohio. Presumably, this is due to the fact that Ohio has not yet passed an E911 cost-recovery system for the PSAPs.

Phase II Service - As Centennial previously has advised the Commission, we are implementing Grayson Wireless' "Geometrix" network overlay solution for E911 Phase II compliance in our domestic markets.' Presently, we are in the pre-deployment engineering stage of the Phase II implementation process for many markets, and in the deployment stage for those few markets that have submitted valid Phase II requests. As of the date of this report, Centennial still has not yet received any Phase II E911 service requests from PSAPs in Mississippi, Ohio or Texas. A list of all Phase II PSAP requests that we have received thus far, along with their

Bauce Communications of Beaumont, Inc., Centennial Michiana License Company LLC, Centennial Southeast License Company LLC, Elkhart Metronet, Inc. and Lafayette Cellular Telephone Company.

⁴ See Centennial Communications Corp Amended Report on E911 Reporting Requirements. filed September 9, 2002.

Id

status. can be found at Attachment B. The main points to be derived from this chart are summarized below.

In Indiana, we are working with the Indiana Enhanced Wireless 911 Board and its Cost Recovery Group ("Indiana Board") in coordinating Phase II E911 deployment. Thus far, we have received four valid PSAP requests. These requests came from PSAPs in the following counties – the date the PSAP request was received is also noted:

<u>County</u>	<u>Date Received</u>
Allen County	February 2, 2001
Elkhart County	January 23, 2001
Steuben County	October 23, 2000
Wells County	March 2, 2002

We will initiate Phase II service in Steuben County later this month, and are striving to initiate service in the remaining three counties by the March 1, 2003 deadline. In the alternative, Centennial has begun working with these counties to establish a mutually acceptable alternate service initiation deadline, in case the March 1 deadline becomes problematic. In addition, Centennial continues to work with the PSAPs in Indiana that have not yet perfected their Phase II requests, and to continue to work with the Indiana Board, to develop the most aggressive Phase II deployment schedule possible for these counties.

In Louisiana, we have received Phase II E911 service requests from PSAPs in the following three parishes on the dates noted: Iberia Parish (April 8, 1997), Iberville Parish (January 27, 2000) and Lafayette Parish (December 20, 2000). We have determined that the Lafayette Parish Phase II request is valid, and are working towards implementing Phase II service there later this month, or again, seeking to reach agreement on a mutually acceptable alternative implementation date. The validity of the Phase II requests from the Iberia and Iberville parishes remains unclear, and we recently sent a "validity questionnaire" to these PSAPs to clarify their status. Finally, in Michigan, we have received a single Phase II request from a PSAP in St. Joseph County, and are still working to determine the validity of this request.

Because no deployment benchmark deadlines have yet passed, Centennial has nothing to report in this regard.

III. Affidavit

I hereby declare under penalty of perjury that the information provided in this response is true and accurate to the best of my knowledge, information and belief.

If you have any questions regarding this report, or require additional information, please contact me, or Terry Cavanaugh at Cole, Raywid & Braverman, LLP, counsel for Centennial, at 202-828-9857.
